IMPORTANT INFORMATION

INTRODUCTION

This guide is intended for the following regular savings and investment products:

- Regular Savings Plan
- Regular Savings Plan Malaysia
- Oracle
- Quantum (for policies taken out after April 2010)
- Quantum Malaysia
- Paragon

For Quantum policies issued prior to April 2010 under the Scottish Provident International brand, please refer to the Scottish Provident International Funds Investment Guide for the relevant fund choices.

This guide provides you with information about the funds that your plan can invest into.

If you are applying for a new plan you should speak to your financial adviser and read the rest of the literature suite in full, which can be accessed on our website www.rl360.com.

CHOOSING YOUR FUNDS

It's up to you to tell us which funds you would like your payments to be invested in. We invest your money creating "units" in the fund, and each unit is valued using the fund price. As the fund price goes up your units increase in value and as the price goes down they decrease.

Some funds perform better than others during the ups and downs of market conditions so we provide you with a wide range of funds in different sectors and asset classes with different risk ratings. Bear in mind that you don't have to invest in just one fund. In fact diversifying your plan across several different style funds can be a wise thing in order to help smooth the returns on your investments.

The range of funds are provided by some of the world's leading managers including BlackRock, BNY Mellon, Columbia Threadneedle, Fidelity, Invesco, JP Morgan, Schroders and T. Rowe Price.

WHY YOUR CHOICE MATTERS

Imagine an athletics team. Now think about all the different events that those athletes will take part in. Why are there specific athletes for certain events? Why not have one person take part in every event? It simply comes down to some individuals being better adapted to certain events than to others.

Likewise with investments you have some which are designed to achieve one goal and others designed to achieve something else.

The question for you is whether you prefer the type of athlete who consistently achieves respectable times and results or the potential of a star who could win the championship but is equally likely to finish last?

In our industry the level of risk you are willing to take to achieve growth is described as your risk appetite, and you need to decide how much risk you are hungry for.

Funds matter because the selections you make will determine how your plan performs and the experience you have whilst meeting your goals.

RL360 MODEL PORTFOLIO SOLUTIONS FUNDS

(Currently not available to our Malaysia products)

Alongside the externally managed fund options, we also offer a range of internal insurance funds; the RL360 Model Portfolio Solutions Funds (the MPS Funds). The funds were launched as an alternative option to having to self-select funds from the Savings and Investment fund range, with asset allocation provided by BlackRock. Each MPS Fund invests in a collection of BlackRock funds across different asset classes, countries and sectors providing diversification within a single fund.

There is a Conservative, Balanced and Growth option, priced in US Dollar. The MPS Funds invest in a diversified mix of BlackRock's mutual funds and iShares index funds of varying percentages, depending on the model, with rebalancing conducted quarterly to reflect current market conditions. Whilst the funds offer an alternative option, there is no restriction to selecting an MPS Fund alongside any of the other funds in the range, should you wish to. More details on how the funds work can be found in the RL360 Model Portfolio Solutions fund guide.

ASSESSING RISK

To help you understand the level of risk attached to each fund, a risk vs reward scale of 1 to 7 is used.

The scale is calculated using a European industry standard, with 1 indicating lower risk and 7 being higher risk.

You will see the risk indicator in a document referred to as the "KIID". This is the Key Investor Information Document. You can find copies of these online via your specific product fund centre on our website at www.rl360.com/fundcentres.

If for any reason a fund within the range doesn't use this standard or produce a KIID, no rating will be provided.

DIGGING DEEPER

Your adviser can provide you with professional support in choosing the right funds to meet your objectives, but if you want to know more for yourself we provide access to more than just the KIID.

In the Documents section of our online fund centre you will find these documents provided by each fund manager:

Fund Prospectus - a legal document that details the investment objective, policy and strategy of a fund or group of funds. This is an in depth and technical document.

Factsheet - usually produced each month providing a summary of performance, holdings and charges.

The fund centre is also a great place to keep up to date with daily price changes and performance over a selection of time periods and methods. It allows you to produce graphs, look at several funds side by side and produce a printable performance bulletin for all the funds in the range.

It even lets you filter the range of funds in a number of ways including by risk rating. Our online fund centre is updated daily and is the very best place to go to ensure you have all the latest fund information available.

MAKE YOUR SELECTION

The following overview lists each fund available by sector along with a range of information about it. Most of these are clear, but some terms you might be unfamiliar with, so here is an explanation:

ISIN - this is simply a reference which identifies the fund in line with international standards.

Domicile - this is where the fund structure has been established, many of which will be in Luxembourg.

AMC % - annual charge applied by the fund manager for running the fund, already taken into account in the fund price.

Perf fee % - this is a performance fee that may become payable where the fund performance has exceeded a certain amount (in fund literature you might see this referenced as the “benchmark”, “hurdle rate” or “water mark”). Performance fees are normally payable in addition to the AMC but also reflected in the price. The fund prospectus will tell you more.

Fund of funds - this is when the fund invests into a series of other funds, these may be offered by the same fund company or multiple other fund companies.

Morningstar ESG Risk Rating - the intention of the ESG Risk Rating is to provide an objective measure for how a fund is managing Environmental, Social and Governance (“ESG”) risks. A fund with a 5/5 score has underlying investments that are considered strong at interacting with the environment around them, the people that they deal with and are well governed. This should mean that they are well equipped to deal with future market environments, take advantage of opportunities and survive through regulatory change.

You can make changes to your fund choice at any time, free of charge, after your plan starts. We call this a “switch”. A switch form is available on our website to help you do this. If you are registered to view your plan online and have applied for online switching, you can even conduct your own switches online quickly without the need to post any forms to us.

Data is sourced from Morningstar® and is correct as at 3 December 2025.

IMPORTANT INFORMATION

FUNDS

Investment can be made into any of the funds available in the range regardless of the denominated plan currency. It is important to know that unit prices reflect the value of the underlying assets of the funds and so can go down as well as up. Past performance is not indicative of future performance. Where a fund invests in overseas securities, the unit prices may also rise and fall purely on account of exchange rate fluctuations.
